

Yesterday, you met “lungs” cloned into E coli (feces bacteria), at right. They rob Oxygen. This Obscenity, “coronavirus”, describes the “crowning achievement of criminal FILTH...” Today, meet those “lungs” cloned onto red blood cells. (RBC vesicles) crowns.

RBCs

“gas vesicle” blisters become clots”

Another word for “crown” is “corona”.

E. Coli cloned into yet another bacteria. The New World Order has named SLOTH. Together, they “clone” into ancient HALO Bacteria. Another name for a Halo is “crown”.

The British Accredited Registry is [still] an International Obscenity; a RICO Syndicate.

The New whirled order uses E. coli circular, spiked plasm A IDs to spin in multiple, man-made, inter species illness (novel Spinae) DOI: 10.1139/M76-067Corpus ID: 37481954 (1976)

“... the cells are longer and have hollow-looking structures (arrow)... December 1997.”

7 G bacteria (Gram dye bacteria) operate “Translocase (formerly known as ‘elongation Facto G’)” to become nourished and spread.

“... RBC vesicles ... were observed... (September 7, 2017)”

The bacillus (E. coli bacteria mutants) causing this, their spores and cellular walls, are now in videos from Montevideo and New Zealand

Please visit the FB page, “Slappingtons” and read the post pinned at top.

The bacillus hook in and compete for oxygen
