The effect of a high frequency electromagnetic field in the microwave range on red blood cells [RBCs]

ANALYSIS:*

Funny thing about this report: It literally links to Fauci and his outfit the NIH.

In other words, it is a separate study, not initially linked to the NIH, at all.

It "demonstrated for the first time that exposure of RBCs to 18 GHz EMF has the capacity to induce nanospheres uptake in RBCs (direct quote)"; the link is below the smoking gun. In other words, EMF aid in RBC delivery systems...

A logical conclusion may also predict successful EMF delivery in a 20 year old virus fashioned in a Chinese Laboratory...

In this study, the nanospheres are a stand-in for medicine (dextran and silica), with two sizes tested 23.5nm and 46.3nm. EMF-assisted delivery enjoy 96% and 46% respectively in each size ... the delivery "increased by up to 12% with increasing temperature from 33 to 37°C (91.4F - 98.6F)".

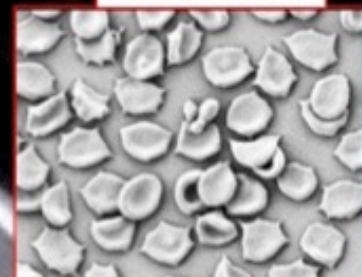

*The initial analysis likened the depletion in failure to transfer (oxygen) in Sickle Cell malformations in the presence of immune responses. Asphyxiation

Do malformed Red Blood Cells (RBCs) diminish oxygen flow?

Obviously, see: Sickle Cell Anemia;
And see Hemolytic Anemia;
This study explains for the first time EMF aid RBC in delivery of foreign agents

"corona blood cells"

Corona blood cells deliver corona virus

Link to NIH: <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5589725/>

To be abundantly clear: there is no evidence the initial scientists are in collusion, while it is also uncertain if any in the NIH understand EMF are "accelerating" what is described by Fauci and Gates "virus" necessitating "mandatory vaccinations"
