

When red blood cells become misshapen, the spikes may resemble a "corona".

It seems likely that corona will damage the interior walls of veins and capillaries and refuse oxygen transfers.

Red Blood Cells

EMF attachments: 15 GHz

In present technologies frequencies are much Higher in strength and Pulsations more concentrated.

Red Blood Cells with EMF attachments

Magnetized Metal repels other metal and creates Spikes

What would this slide show at 98.6 degrees?
Or with victims with a higher temperature?

This slide depicting red blood cells comes from the NIH.gov link in the top right (Fauci's outfit). The blood is cooled in the slide to 37°Celsius (97 F +/-).
